JEPPESEN PARTNERS WITH NAVAERO TO OFFER CLASS 1 AND 2 ELECTRONIC FLIGHT BAGS TO THE COMMERCIAL AVIATION MARKET

ENGLEWOOD, COLO., November 22, 2004 – Jeppesen and navAero have formed a partnership and will offer complete turnkey Class 1 and 2 Electronic Flight Bag (EFB) solutions to commercial aviation operators. Jeppesen will bring the following Class 1 and 2 EFB applications to the partnership: an EFB application manager; a chart application that allows Jeppesen’s global chart library to be stored, updated and viewed electronically; an electronic document storage and viewer application; a performance application that allows quick and precise calculations; and video surveillance capability for increased safety and security. Jeppesen will also provide its Ground Tools suite that includes its Data Distribution and Management (DDM) application, a back-end delivery and management mechanism for applications, data and configuration files.

navAero will serve as an integrator by bringing to the partnership its expertise in hardware, Supplemental Type Certificates (STC), hardware mounting and post-sale support services. Together, navAero and Jeppesen are now able to offer an end-to-end unique solution to airlines seeking to transition to a paperless flight deck.

“navAero is a clear leader and innovator in the EFB market,” said Mark Van Tine, Jeppesen president and COO. “navAero’s expertise in hardware, integration and support will play a key role in Jeppesen’s future as we continue transitioning our customers to digital-based services.”

About navAero

navAero delivers innovative and cost-effective situational awareness solutions to pilots throughout the world. navAero's premier product, the t•BagC2™, electronic flight bag system is the most affordable platform on the market today for running advanced aeronautical software. Designed in 2003, the t•BagC2 is compatible with a wide variety of software solutions and provides an affordable way to fly more safely through optimal situational awareness and help commercial operators increase operational efficiencies. navAero, Inc. was formed in 2003 as a privately held Delaware corporation with international corporate headquarters in Chicago.
