navAero Achieves ISO 9001:2000 Certification

CHICAGO, IL USA – December 13, 2006 -- navAero, the industry leader in Electronic Flight Bag computer and display technology announces that it has achieved the prestigious ISO 9001:2000 certification, the International Quality Management System requirements standard for businesses by third party agency Bureau Veritas Certification Sverige AB. Achieving ISO 9001:2000 documents that navAero meets the specific requirements for a quality management system and enhances navAero's ability to consistently provide products and services that meet their customers' expectations.

"Following the principles of the ISO 9001:2000 system has helped us establish the infrastructure necessary for our organization to meet and exceed our customers' needs and expectations." said Stefan Ridderheim, CEO of navAero. "It is also a recognition of our strong customer focus and demonstrates our willingness and desire to maintain the greatest level of excellent to support our customer's needs." Reinforcing and supporting this statement, Carin Ekstrom, ISO management representative for navAero stated, "At the same time, we believe quality is an ongoing process rather than a definite target, and we take this opportunity to reaffirm our commitment to the continual improvement of all business processes to further enhance overall standards."
