**NAVAERO RELEASES FIRST-EVER
AFFORDABLE SOFTWARE DISPLAY
FOR PRIVATE PILOTS
(t•Pad™ 800 retails for under \$1,000 and launches at EAA 2003)**

(CHICAGO) navAero, creator of innovative situational awareness solutions for private pilots, introduces its premiere product, the **Tactical Pilot Awareness Display (t•Pad™ 800)**. Named for placing an emphasis on situational awareness and featuring a screen resolution of 600 x 800 pixels (portrait mode), the **t•Pad 800** is the most affordable display on the market today for viewing advanced aeronautical software.

WHAT IS IT?

The **t•Pad 800** is an 8" (diagonal) color touch screen attached to a sleek, curved aluminum base that fits comfortably around the pilot's leg. The screen, which is sunlight readable, is connected to an interface box that links to a laptop computer, allowing pilots to experience the advantages of electronic flight-bag technology at a fraction of the expected cost. Both the interface box and the laptop can be stored discreetly behind the seat. The **t•Pad 800** is powered by a plug-in 12v connection to the cigarette lighter available on most small planes.

navAero t-Pad 800/page 2

With the **t-Pad 800**, pilots can use all of the most advanced Windows-based aviation software such as:

- *FliteMap*® for total navigational superiority
- *JeppView*® with *FlightDeck*® for the industry standard in IFR
- Mountainscope™ (for excellent altitude awareness)
- FUGAWI Military™ (for tactical low-level navigation)
- Flightsoft™/Vista (for a low cost moving map solution)

The **t-Pad 800** retails for under **\$1000** and is available at the EAA 2003 show (booth #2123) or by visiting www.navaero.com.

FEATURES & BENEFITS

The **t-Pad 800** provides pilots with the following capabilities:

- Maximizes safety, efficiency and control in the cockpit
- Reduces distractions and workload
- Accesses moving-map navigation with all current aeronautical data
- Increases safety by avoiding runway and airspace incursions
- Helps reduce pilot error
- Performs instant calculations and conversions
- Manages approach plates, manuals and checklists
- Executes flight planning
- Stays current with the pilot logbook

The **t•Pad 800** is equipped with the following unique features:*

- Sunlight-readable touch screen with stylus
- Fully dimmable screen, for night flying
- Onscreen keyboard
- Full-monitor functionality
- Enables all capabilities of moving-map technology
- Rugged yet lightweight aluminum construction
- Thin and comfortable ergonomics
- Upfront brightness controls
- 8.4" active-matrix liquid crystal display color screen
- Display: 800 x 600 pixel (portrait mode)
- Optional battery runs and charges your laptop at same time it runs t•Pad 800
- 1-year warranty (parts and labor)
- Fits the standard 6-1/4" radio stack for experimental aircraft
- All necessary drivers, cables and portrait-mode software included
- Assembled in USA

*VGA, USB and 12V power cables included. GPS sold separately.

ABOUT NAVAERO

navAero, Inc. was formed in 2003 as a privately held Delaware corporation with international corporate headquarters in Chicago. CEO Stefan Ridderheim founded navAero after a close friend was killed in a tragic runway incursion at Linate Airport in Milan, Italy, on October 8, 2001. This accident and others like it emphasized the need for increased situational awareness solutions for private pilots. Ridderheim has been a pilot for more than 30 years.

The t•Pad should not be used as your primary navigational source. t•Pad 800 is a trademark of navAero Corporation. Pentium is a registered trademark of Intel Corporation. Windows is a registered trademark of Microsoft. Jeppesen Flightmap, Jeppesen JeppView with FlightDeck, Mountainscope, FUGAWI and Flightsoft are trademarks of each of these corporations, respectively.
