**navAero Signs Fleet-Wide Class 2 Electronic Flight Bag Contract with
European Charter Operator Viking Airlines**

SUNDSVALL, SWEDEN, March 20, 2009 — navAero announces that the t•Bag™ C2² Electronic Flight Bag system has been selected by Viking Airlines for fleet wide deployment for B737NG and B737CL Series and McDonnell Douglas MD-83 aircrafts.

“We are convinced that navAero’s technology will give us a future proof and cost effective platform that will further enhance our operations. We’re tremendously impressed of the broad range of achieved FAA and EASA STC’s, this shows that our choice is right”, says Christian Tadjeran, Accountable Manager & CEO of Viking Airlines.

The contract covers a fleet wide deployment of Viking Airlines’ five Boeing 737s and one McDonnell Douglas MD-83 aircraft. Deployment of the contracted platform has already started and will be finalized during 2009.

“We are very happy to announce that yet another European customer have chosen our cost efficient, environmental friendly and safety enhancing state-of-the art EFB platform”, concludes Knut Aabo of navAero.

navAero, Inc. is the world leader in developing and commercializing cost effective electronic flight bag products. For further information, visit the navAero website at www.navaero.com
